

S900 Series

We are pleased to announce the release of Stonex S900 GNSS Series.

Available in three models, the S900 GNSS Series is the result of the continuous evolution of the Stonex GNSS integrated receivers. Featuring a new, high accuracy multi constellation antenna, a powerful UHF transmitter and the GSM 4G modem, for a fully integrated communications choice, combined with a light and modern design.

Stonex S900 integrated GNSS Series tracks all the present constellations and satellite signals GPS, GLONASS, BEIDOU, GALILEO and QZSS and through the upgradable firmware offers the opportunity to be day by day updated with the latest available features. On S900 GNSS Series it is possible to insert 2 smart hot swappable batteries at the same time, ensuring a maximum of 12 hours of operation without stopping.

The power level can be checked and seen on the controller or directly on a led bar on the battery. Moreover, the same battery is used on S900 and on the Stonex controllers S4II C/H.

About Stonex

Stonex is one of the world leader company on measurement and survey, with over 80 qualified distributors worldwide.

Thanks to the integration of different positioning technologies and software the wide range of solutions allows to meet the needs of many fields of application and industries, such as: building and construction, land survey and cadastral survey, GIS data collection, 3D Scanning (architecture, archeology, industrial measurements, volume calculations), agriculture and smart farming, land and structure monitoring.

Each geospatial requirement can then be addressed and solved with a Stonex solution.

Joined together with an unbeatable professional expertise Stonex offers a wide range of top quality services, to satisfy all pre-sales and post-sales needs.

Stonex is a part of Beijing UniStrong Science & Technology Co., Ltd, global provider of GNSS, positioning and timing technology for the geospatial market.
