Stonex srl: the Made in Italy quality

Stonex announces a new generation of "Made in Italy" GNSS receivers

Stonex is proud to announce the launch of the first "Made in Italy" GNSS receivers on the surveying market. Already by 2013 Stonex launched the first "Made in Italy" instrument, the X300 3D Laser Scanner. Thanks to this product the Company was awarded the 3rd Place for Best Product of the "WICHMANN INNOVATION AWARDS" as "the most innovative product of the year" during INTERGEO 2013.

DESIGN

Stonex designs and develops its products internally in Italy. The quality of Stonex products is supported by technological innovation that optimizes its functioning.

PRODUCTION

Thanks to the use of the best components, Stonex offers an excellent product in full compliance with regulatory aspects such as safety, production with low environmental impact and Italian certifications.

TESTING

The pre-post production development and support division studies design and develop the products in-house, respecting high quality standards and ensuring a state-of-the-art product with high performances.

"We are very happy, in just few years, to have reached the maturity in the development of a Made in Italy surveying product that meets the qualitative demands of the market" says Mauro Colombi, VP of Operation & Sales at Stonex. "Stonex is an Italian Company and has met all the requirements to guarantee the production of Italian GNSS instruments, a world-wide symbol of quality and reliability".

About Stonex

Stonex is one of the world leader company on measurement and survey, with over 100 qualified distributors worldwide.

Thanks to the integration of different positioning technologies and software the wide range of solutions allows to meet the needs of many fields of application and industries, such as: building and construction, land survey and cadastral survey, GIS data collection, 3D Scanning (architecture, archeology, industrial measurements, volume calculations), agriculture and smart farming, land and structure monitoring.

Each geospatial requirement can then be addressed and solved with a Stonex solution.

Joined together with an unbeatable professional expertise Stonex offers a wide range of top quality services, to satisfy all pre-sales and post-sales needs.

Stonex is a part of Beijing UniStrong Science & Technology Co. Ltd, global provider of GNSS, positioning and timing technology for the geospatial market.
